

# OpenCV extern modules

---

如何编译OpenCV额外的模块呢？

下载

[https://github.com/opencv/opencv\\_contrib](https://github.com/opencv/opencv_contrib)

```
cd opencv_contrib  
git checkout 3.4.3 #对应你的版本号
```

然后进入OpenCV源码编译时候的那个build文件夹中，添加外部modules

```
$ cd <opencv_build_directory>  
$ cmake .. -  
DOPENCV_EXTRA_MODULES_PATH=/home/ou/software/OpenCV_dir/opencv_contrib/modules  
$ make -j5
```

## tips
